

## **Handling the Test Data and Executing It in Multiple Environments for Bus Ticket Booking Application.**

### **Description**

Create a TestNG framework that helps to test the bus ticket booking application in multiple environments.

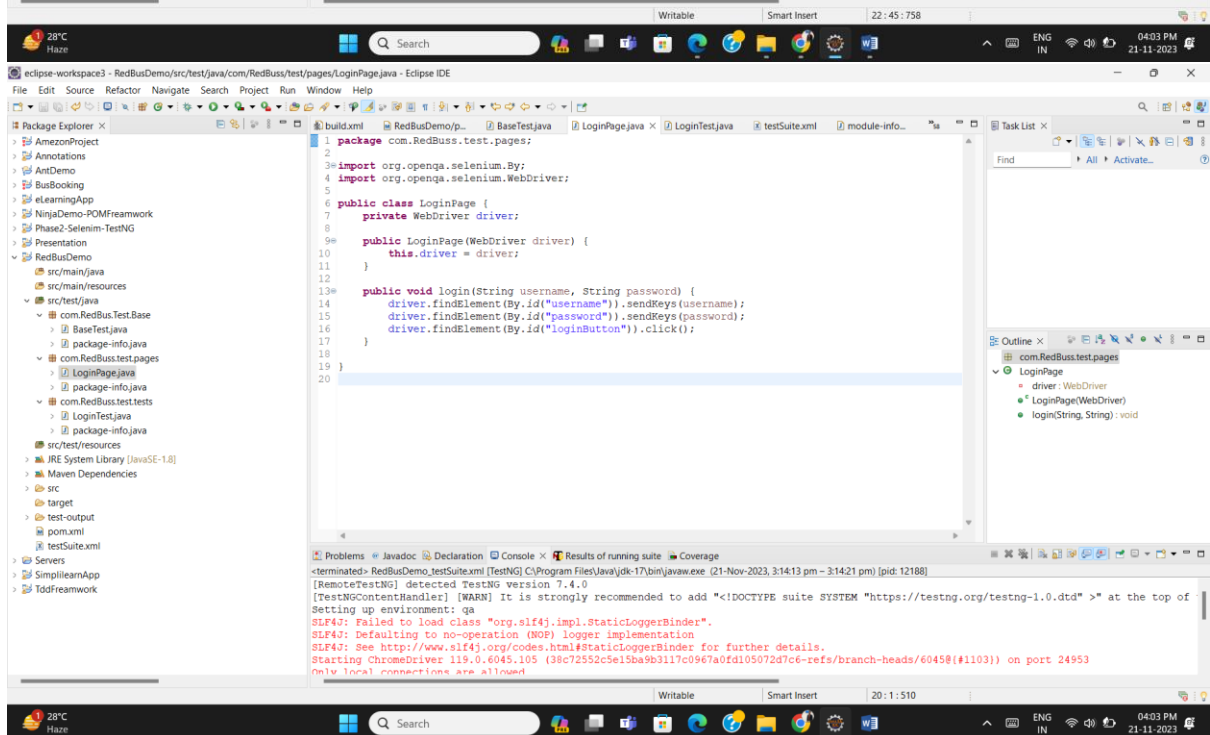

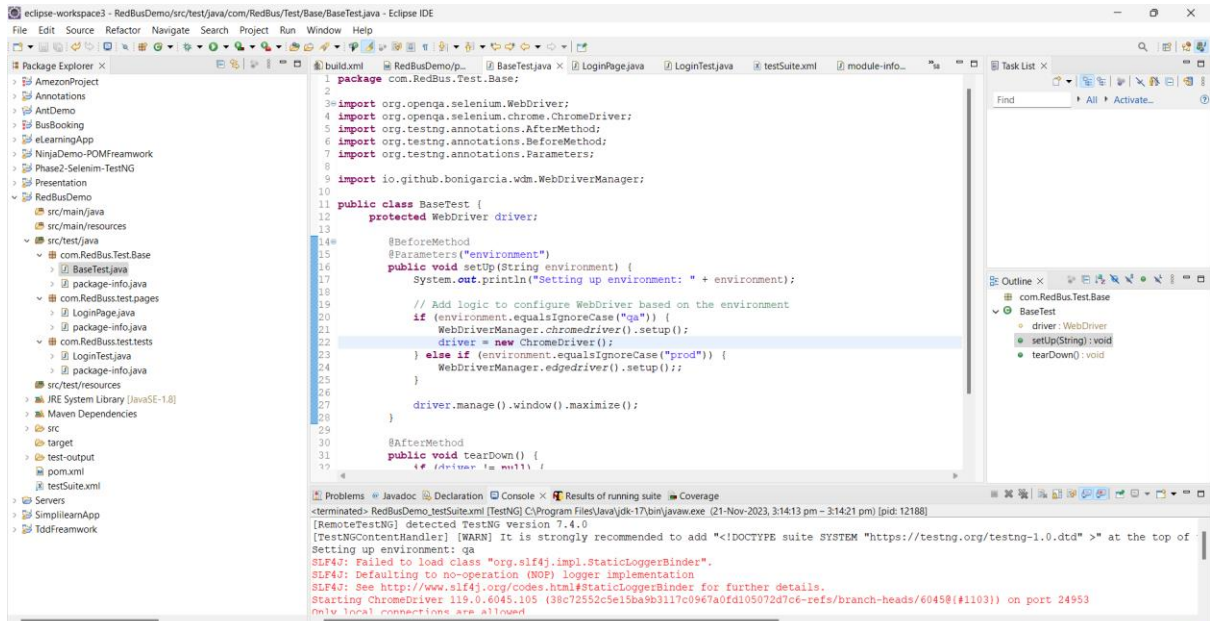

### **Background of the problem statement:**

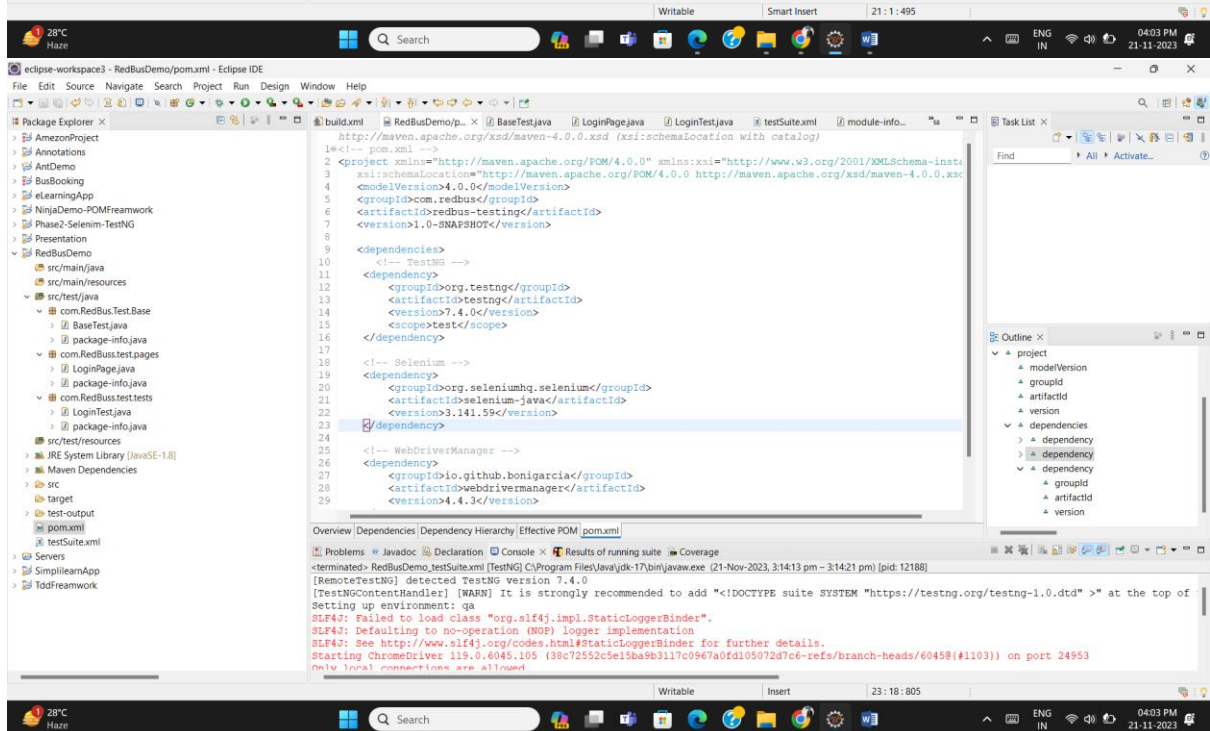

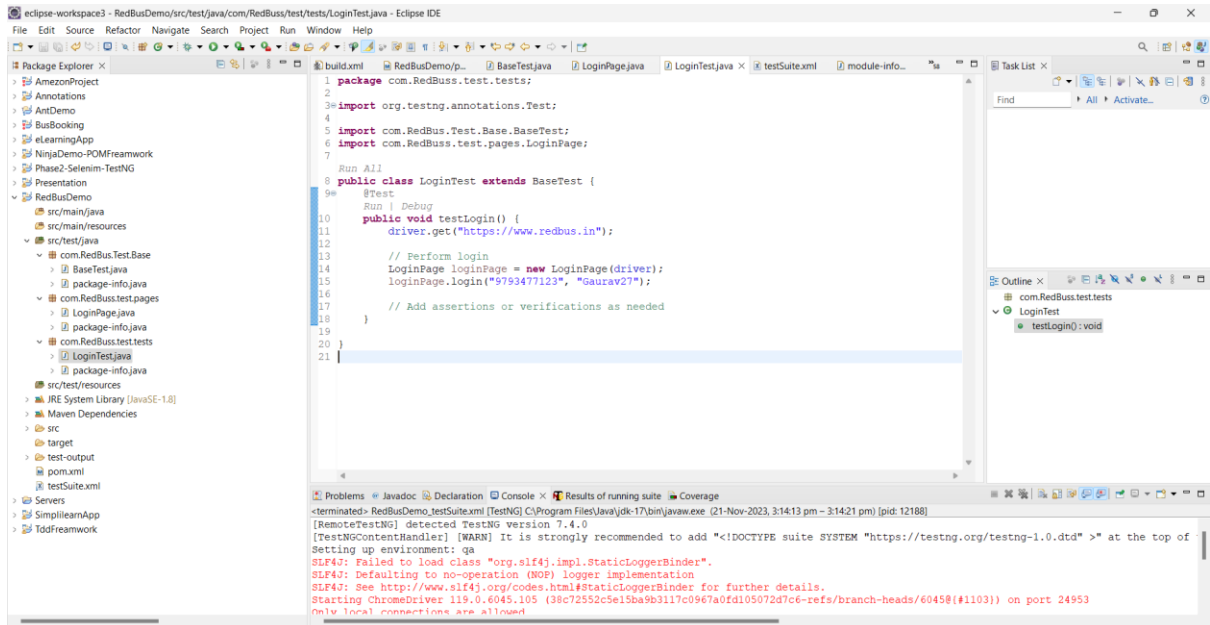

As a part of developing TestNG and POM framework, the admin requires a resource like multiple virtual machines to execute it in different environments.

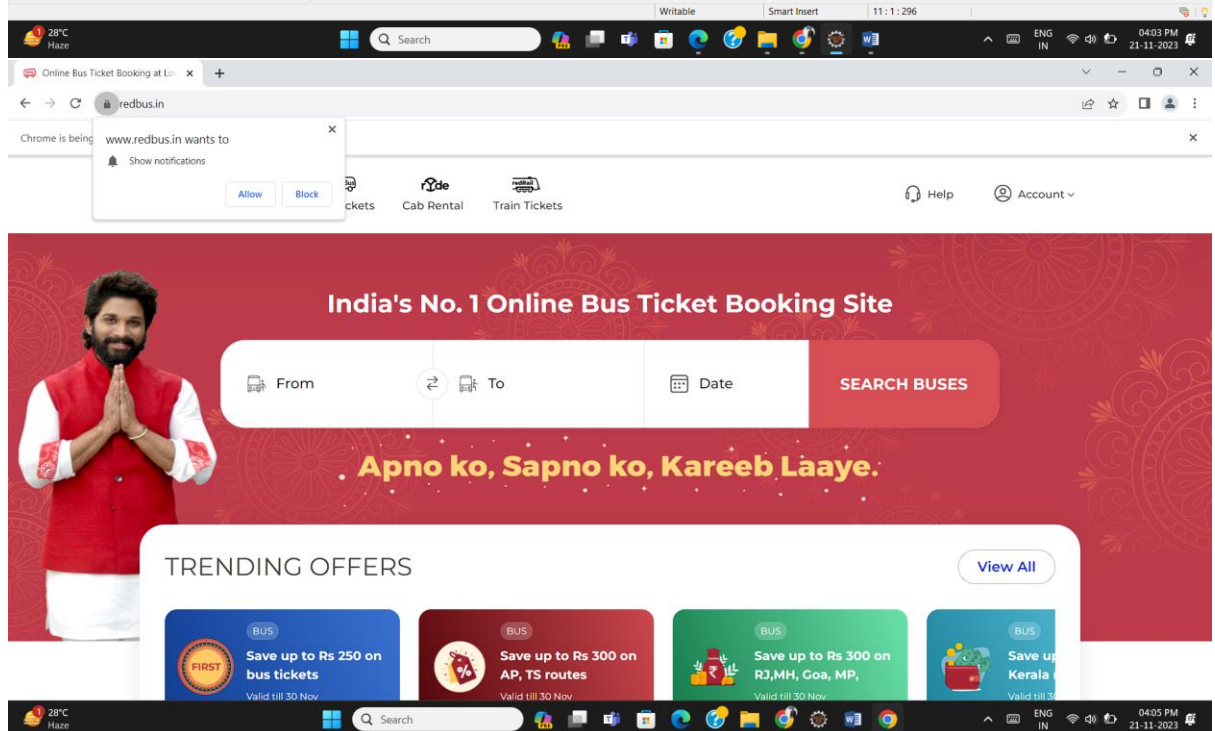

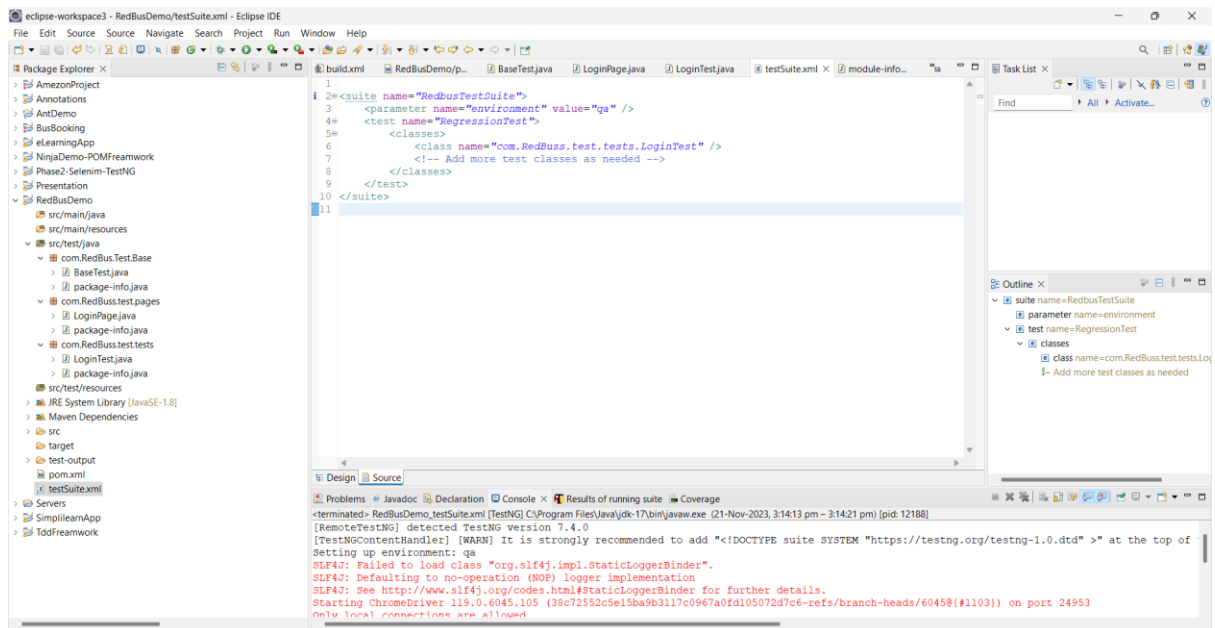

### **You must use the following:**

- Eclipse IDE
- Java Development Kit (Version 8)
- Selenium standalone server (Version 3.141.59)
